Priya Sharma

Software Engineer

priya.sharma@example.com | +91 98765 43210 | Bengaluru, India | github.com/priyasharma

SUMMARY

Software engineer with 4 years of experience building web applications, specializing in React, Node.js, and Python. Proven track record of developing responsive user interfaces, scaling REST APIs, and containerizing deployments on AWS.

SKILLS

React · Node.js · Python · JavaScript · PostgreSQL · Docker · Git · Flask · HTML · CSS · Jira

EXPERIENCE

Software Engineer · Finlytics Pvt Ltd — Bengaluru · Jan 2022 - Present

- Developed features for the customer dashboard used by 40,000 monthly users.
- Engineered REST APIs in Flask for payments reconciliation, cutting manual work by 30%.
- Containerized and deployed services using Docker on AWS EC2.
- Authored unit tests and resolved production bugs to maintain high reliability.

Associate Developer · BrightApps — Pune · Jul 2020 - Dec 2021

- Built responsive React components for an e-commerce storefront.
- Integrated Razorpay payment gateway to support secure transactions.
- Contributed to code reviews and sprint planning within an Agile environment.

PROJECTS

DocuChat - chatbot that answers questions over PDFs using OpenAI API and FAISS.

- Built ingestion pipeline and a simple React UI.

EDUCATION

B.Tech in Computer Science · VIT Vellore — 2016 - 2020

CGPA 8.4
